Yann Lucas Saito da Luz

Full-Stack Developer | React, Vue.js, TypeScript, and Python

y4nnls.github.io/portfolio | linkedin.com/in/yann-lucas-luz | github.com/Y4nnLS

Professional Summary

Full-Stack Developer with experience building and evolving web applications using React, Vue.js 2 and 3, TypeScript, Python, FastAPI, and Java/Quarkus. Experienced with user interfaces, APIs, integrations, automation, SQL and NoSQL databases, and event-driven systems. At Ensitec, reduced memory consumption on Vue.js pages by more than 50%, from approximately 3 GB to a stable 1 GB, and refactored an entire Java 21/Quarkus API. Additional experience with auction and notification system prototypes, WebSocket, automated testing, and Docker.

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, Java 21, SQL.
- **Front-End:** React, Vue.js 2 and 3, Composition API, HTML, CSS, component-based development, responsive design, API integration.
- **Back-End:** Flask, FastAPI, Quarkus, Fastify.
- **APIs & Integrations:** REST, WebSocket, JWT, Keycloak, event-driven architecture.
- **Databases:** PostgreSQL, MongoDB, SQLite, DynamoDB.
- **Testing:** Jest, Vitest, unit testing, integration testing, E2E testing.
- **DevOps & Tools:** Git, Docker, Docker Compose, Terraform, AWS SNS, Nginx.

Soft Skills

- Problem-solving, teamwork, initiative, and attention to detail.

Professional Experience

Front-End Developer - M3 Technologies

Curitiba, Paraná, Brazil | Feb 2026 – Jul 2026

- Developed and maintained Dealer Auctions, a customer-facing vehicle auction platform, using React and TypeScript to build responsive interfaces and application flows.
- Developed and maintained more than 50 components, including reusable components shared across multiple screens, following visual specifications and responsive design standards.
- Proposed a standardized workflow for commits, branches, and pull requests using Git, which was subsequently adopted by the development team.
- Independently designed the Auction Engine technical prototype using TypeScript, Fastify, WebSocket, PostgreSQL, DynamoDB, and Terraform, covering bidding flows, auto-bidding, event consistency, and unit, integration, and E2E testing.
- Designed the Notification Engine technical prototype using an adapter-based architecture, allowing providers to be replaced without restructuring the system and supporting email, push, SMS, and web notifications, persistence, delivery status, and retry mechanisms with AWS SNS and PostgreSQL.
- Documented and presented the technical prototypes, which were reviewed and used as a foundation for validating and evolving project functionality.

Full-Stack Developer - Ensitec Tecnologia

Curitiba, Paraná, Brazil | Dec 2025 - Feb 2026

- Started the development of a cross-platform mobile and desktop application using Flutter.
- Developed and maintained more than 65 reusable components shared across multiple screens of the cross-platform application.
- Continued working on the telemetry platform, contributing to technical decisions, requirements gathering, and feature implementation.

Full-Stack Developer Intern - Ensitec Tecnologia

Curitiba, Paraná, Brazil | May 2024 - Nov 2025

- Reduced memory consumption on Vue.js pages by more than 50%, from approximately 3 GB to a stable 1 GB, resolving performance degradation, freezes, and crashes on iOS devices.
- Refactored an entire user management API built with Java 21 and Quarkus, replacing manual JSON string concatenation with DTOs, structured models, and Jackson serialization.
- Developed features for a telemetry and data-processing platform using Vue.js 2 and 3, APIs, and databases.

- Developed and standardized more than 100 components, including reusable components shared across multiple screens of the system.
- Implemented Excel, PDF, TXT, and CSV report generation and automation solutions to support system development and testing.

Freelance Developer - Front-End, Back-End, and Automation
Curitiba, Paraná, Brazil | Jan 2022 - Present

- Develop custom solutions for clients, including websites, web applications, APIs, data analysis and processing, scripts, and automation.
- Integrate front-end, back-end, and database layers according to solution requirements, using technologies such as Python, JavaScript, PostgreSQL, and MongoDB.
- Develop scripts and automation solutions for data processing, information organization, and reduction of repetitive manual tasks.
- Work across the project lifecycle, from requirements gathering and scope definition to development, delivery, bug fixes, and maintenance.

Selected Projects

Web Application for Speech Emotion Recognition
Undergraduate Capstone Project | Vue.js, Python, FastAPI, PostgreSQL, REST & WebSocket

- Developed the entire front-end and back-end of the web application as part of a six-member capstone team and was also responsible for integrating the Machine Learning models developed by the team.
- Implemented API endpoints and audio file processing on the back-end and used WebSocket to provide the front-end with processing status updates and results as soon as processing was completed.
- Developed the complete workflow from file upload and processing to inference and result presentation, including metrics and visualizations to support analysis.

Financial Control Platform
Personal Project | React, TypeScript, FastAPI, PostgreSQL & Docker

- Develop and maintain a deployed full-stack financial management application using React and TypeScript on the front-end, FastAPI on the back-end, and PostgreSQL for data persistence.
- Implemented financial transactions, credit cards and billing cycles, dashboards, charts, goals, debts, reminders, and forms with business-rule validation.
- Set up the application environment with Docker and implemented E2E tests to validate application flows.

Education

Bachelor's Degree in Computer Science
Universidade Positivo | Curitiba, Paraná, Brazil
Graduated Dec 2025

- Placed among the top three teams in five editions of the ETIUP Programming Marathon, including three first-place finishes.

Languages

- **Portuguese:** Native.
- **English:** Intermediate (B1).
